

## FR Labs Puppy Contract

FR Labs agrees to sell the puppy \_\_\_\_\_ from the \_\_\_\_\_ litter, born \_\_\_\_\_ to \_\_\_\_\_ for \$ \_\_\_\_\_. All puppies are registered with the American Kennel Club (AKC) and the United Kennel Club (UKC).

AKC #  
UKC #  
Micro-chip #  
Wormed with Strongid -  
DHPP Vaccination -

Puppies sold from FR Labs come with a 28 month hip and eye congenital health contract. This contract applies only to the original purchaser, it is non-transferrable. If the dog is used for breeding before all health tests are completed or for a mixed-breed breeding, including dilutes, this contract becomes void. This contract will also become void if you spay/neuter your puppy. Because of the importance of proper nutrition during the first year of their life, your puppy must be fed a high quality puppy food until their first birthday or this contract becomes void.

All dogs used in the FR Labs breeding program have been tested for and are clear of exercise induced collapse (EIC) and centronuclear myopathy (CNM). Only dogs that have OFA hips rated as good or excellent for hip are used for breeding.

Before leaving our home, all puppies have had their declaws removed, their first round of shots at 6 weeks, and wormed at 3, 5, and 7 weeks.

### HIPS

All dogs must have their hips x-rayed and submitted to the Orthopedic Foundation for Animals (OFA) between 24-28 months of age to test for hip dysplasia. If a dog receives a diagnosis or hip dysplasia or any level, the refund process will begin (see below). If a dog cannot pass due to an accident or negligence, this contract becomes void. If your puppy is deemed overweight by a vet at any time before hip x-rays are taken, this hip contract becomes void.

### EYES

All dogs eyes must be evaluated by a certified ophthalmologist to receive a passing CAER (formerly CERF) evaluation by 28 months of age. If a dog does not receive a passing CAER, the refund process will begin. If a dog cannot pass due to an accident, this guarantee becomes void.

### REGISTERING YOUR DOG

All litters are registered with AKC and UKC. We recommend registering your puppy with both organizations but they must be registered with at least one organization. The use of the FR Labs prefix (FR's) in your dogs registered name is allowed and encouraged, but it is not a requirement of this contract.

### MICRO-CHIPS

All of our puppies leave micro-chipped and registered to FR Labs. The paperwork to transfer this registry to the new owner is included in the puppy packet.

## REFUND PROCESS

If your dog does not receive a passing evaluation from OFA for hips and/or CAER for eyes, please do the following:

1. Contact us within 30 days of the findings
2. Mail or email us the findings and any supporting material
  - a. If necessary, we will submit for a second opinion at our expense
3. Your options for a refund are:
  - a. If you do not want to keep the dog, you can return it to FR Labs along with turning the AKC and UKC registration over to us and we will offer a complete refund.
  - b. If you want to keep the dog, provide us with proof of spaying/neutering from a licensed veterinarian, then we will refund half of the purchase price.
  - c. Choose option A or B and instead of receiving a refund, we will put your refund towards a puppy in one of our upcoming litters.

\*\*If you are no longer able to keep your dog, please contact us immediately. All of our dogs are welcome back at FR Labs and will find a good home for your dog.
